Education

Georgia Institute of Technology | Atlanta, GA *August 2021 – May 2025*
Bachelor of Science in Computer Science (Info Internetworks/Intelligence), GPA: 4.00
Relevant Coursework: Linear Algebra, Multivariable Calculus, Object Oriented Programming, Algorithms and Data Structures, Computer Organization & Programming, Database Design, Computer Science Ethics.

Experience

FlightBridge, LLC *May – August 2022*
Software Engineer Intern Atlanta, GA

- Continuously developed an online booking and management platform for the private aviation industry.
- Developed a tool using C# and the Google Maps API to visualize hotel data for over 1000 customers.
- Integrated Vue.js into an ASP.NET application to help build a custom scheduling tool used by 100+ pilots.
- Utilized SQL and LINQ in C# to build a hotel recommendation engine that increased hotel search efficiency

Griffin Solutions Group *May – August 2021*
Software Engineer Intern Johns Creek, GA

- Researched RPA and automated web UI testing using UiPath and Puppeteer to increase productivity.
- Developed features on website portal used by 50+ employees at a top insurance firm in North Carolina.
- Designed and developed website acting as online employee portal for prominent security company in Arizona.
- Utilized React for front-end of websites developed, with Node.js and PostgreSQL handling the backend.
- Followed an Agile development methodology to coordinate with 40+ other coworkers.

Projects

EssAI | React, Flask, SQL *January - April 2022*

- Leveraged powerful AI models to create a website that hosted a multitude of tools used to improve essays.
- Utilized Flask to create a robust API that connected AI models to a React-based frontend.
- Continuously stored data in an SQL server to further train the AI models as the users used the website.
- Project currently hosted at ess-ai.com

Book Directory API | Node.js, Express, MongoDB *January 2021*

- Created a personal book directory API to store basic book information.
- Used Node.js and Express to build the API, stored data in MongoDB Atlas cloud server.
- Follows REST API principles and has basic CRUD capabilities to create and edit new book entries.

Organizations

Phi Kappa Theta Fraternity *January 2022 – Present*
Vice President of Programming

- Planned and organized a multitude of events and trips that often involved hundreds of people.
- Coordinated philanthropy efforts that helped raise over $1000 for the Children's Miracle Network.
- Worked with numerous sororities and other organizations at Georgia Tech to organize events.
- Was responsible for leading a committee of over a dozen people to organize on-campus events.

GT Web Development Club | Georgia Tech *August 2021 – Present*

- Form team every semester to create a full-stack web application throughout the semester.
- Follow Agile development cycle and use Git, GitHub to keep project organized.
- Required extensive use of teamwork, communication, and organization skills.
