Education

Georgia Institute of Technology | Atlanta, GA *August 2021 – May 2025*
Bachelor of Science in Computer Science (Info Internetworks/Intelligence), GPA: 4.00
Relevant Coursework: Linear Algebra, Object Oriented Programming, Algorithms and Data Structures, Computer Organization & Programming, Database Design, Design & Analysis of Algorithms.

Universitat Politècnica de Catalunya | Barcelona, Spain *May 2023 – August 2023*
Georgia Tech Barcelona Summer Program, GPA: 4.00
Relevant Coursework: User Interface Design, Technology and Sustainable Community Development.

Experience

FlightBridge, LLC *May – August 2022*
Software Engineer Intern Atlanta, GA

- Continuously developed an online booking and management platform for the private aviation industry.
- Developed a tool using **C#** and the Google Maps API to visualize hotel data for over 1000 customers.
- Integrated **Vue.js** into an **ASP.NET** application to help build a custom scheduling tool used by 100+ pilots.
- Utilized **SQL** and **LINQ** in C# to build a hotel recommendation engine that increased hotel search efficiency.

Griffin Solutions Group *May – August 2021*
Software Engineer Intern Alpharetta, GA

- Researched RPA and automated web UI testing using **UiPath** and **Puppeteer** to increase productivity.
- Used **Figma** mockup to develop an online employee portal for a prominent security company in Arizona.
- Utilized **React** for front-end of websites developed, with **Node.js** and **PostgreSQL** handling the backend.
- Followed an **Agile** development methodology to coordinate with 40+ other coworkers.

Projects

EssAI | React, Flask, SQL *January - April 2022*
Team Project

- Leveraged AI models with **GPT-3** to create a website that hosted a multitude of tools used to improve essays.
- Utilized **Flask** to create a robust API that connected AI models to a React-based frontend.
- Continuously stored data in an **SQL** server to further train the AI models as the users used the website.

Lightning from the Edge of Space *January 2023 - Present*
Georgia Tech Vertically Integrated Project

- Multidisciplinary project team focused on creating and launching weather balloon to study upper atmosphere.
- Coordinated sensor technology and custom software to measure and analyze different atmospheric metrics.

Organizations

GT WebDev | Georgia Tech *August 2021 – Present*
Member

- Formed a project team to create a full-stack web application acting as an AI-powered essay tools dashboard.
- Responsible for developing middle-tier level of application by connecting **Flask** backend to **React** frontend.
- Followed Agile development methodology and used **Git** and **GitHub** to keep project organized and on track.
- Required extensive use of teamwork, communication, and organization skills to keep team on the same page.

Phi Kappa Theta *January 2022 – Present*
Vice President of Programming

- Coordinated philanthropy efforts that helped to raise over $1000 for the Children's Miracle Network.
- Directly managed budget of over $30,000 by leading committee of 10+ people to organize events on campus.
