Education

Georgia Institute of Technology Aug 2021 - Dec 2024

Bachelor of Science in Computer Science (GPA: 4.00 / 4.00) *Atlanta, GA*

- **Research Assistant:** Data-Driven Product Design for Non-Profits

Experience

Tesla Mar 2025 – Present

Software Engineer *Austin, TX*

- Develop and deploy full-stack features in Agile 2-week sprints for an internal factory tool tracking equipment maintenance/data used by 50,000+ people.
- Build and maintain high-performance Go microservices using Docker and Kubernetes, with a focus on MySQL query optimization for data involving millions of maintenance orders across 6 global factories.
- Improve system reliability by identifying and resolving production issues through observability tools like Splunk, Grafana, and database profiling.
- Manage and troubleshoot Kafka infrastructure, including topic creation, certificate handling, and messaging issues.
- Utilize custom AI workflows to automate parts of the development process and speed up the development process.
- Led initiative to partition the main database to increase scalability and performance as the software system scaled up to more users and data.

Tesla May 2024 – Aug 2024

Software Engineer Intern *Fremont, CA*

- Developed features for in-house equipment maintenance software using Golang, MySQL, and Angular.
- Created Grafana dashboards to display data analytics and predict equipment failure using equipment data retrieved from a Kafka data pipeline.
- Led design/implementation of API for creating forms and workflows that were used across the company by over 20,000 people.

FlightBridge May 2022 – Aug 2022

Software Engineer Intern *Atlanta, GA*

- Continuously developed an online booking and management platform for the private aviation industry.
- Developed a tool using ASP.NET and the Google Maps API to visualize hotel data for over 1000 customers.
- Utilized SQL and LINQ in C# to build a hotel recommendation engine that increased hotel search efficiency.

Griffin Solutions Group May 2021 – Aug 2021

Software Engineer Intern *Alpharetta, GA*

- Followed an Agile development cycle to work on multiple software projects at a software solutions company.
- Used React to develop frontend features and worked with Node.js and PostgreSQL to develop API endpoints.

Projects

Magnidia | *Next.js, TypeScript, PostgreSQL* magnidia.com

- Led a 6-person development team as a project manager to develop a web app for creating/sharing events.
- Built using TypeScript, Next.js and Tailwind with authentication using NextAuth and Google Cloud.
- Used a serverless API built using Next.js app routing that stores data with Prisma, PostgreSQL, and AWS.

Certifications

Microsoft Azure Fundamentals | *AZ-900* May 2025

- https://learn.microsoft.com/en-us/users/IanWood-7304/credentials/73C405740EA2E23

Technical Skills

Languages: Go, Python, TypeScript, C#, Java, SQL
Web Development: Next.js, React, Node.js, ASP.NET, Tailwind, HTML/CSS
Technology: Git, Docker, Kubernetes, Grafana, Jenkins, Azure, AWS, Kafka, Splunk, MySQL, PostgreSQL, ClickHouse
